¹⁻Annual projections established in the 2010 Service Implementation Plan (SIP)

Total Sound Transit ridership increased by 5 percent during the Fourth Quarter, with almost all of the increase attributable to Central Link. The light rail extension to Sea-Tac Airport opened in mid-December 2009, fueling an impressive 38 percent increase in Central Link boardings. ST Express bus and Sounder boardings continued a downward trend that started in the Third Quarter, while Tacoma Link boardings were up slightly. Several factors contributed towards lower bus and Sounder ridership. For example, ridership was adversely impacted by snow and ice November 22-25, with some bus routes cancelled and others running on a reduced schedule during this four-day period. Frozen switches delayed Sounder service and resulted in some cancelled trains. By contrast, the adverse weather had little impact on Central Link and Tacoma Link service. Christmas and New Year's Day were on Saturdays, resulting in very low bus and Sounder ridership the Friday before, as many people took an early holiday. The 2010 calendar also resulted in more days when a Sunday/holiday schedule was operated rather than a Saturday schedule, further reducing service levels and ridership compared with 2009.

Year-end 2010 Sound Transit ridership totals fell short of projections in the 2010 Service Implementation Plan (SIP). The SIP predicted 25.6 million boardings in 2010, but actual ridership totaled 22.8 million. While this represents an increase of 21 percent over 2009 when 18.8 million boardings were recorded, virtually all of the increase was due to growth in Central Link ridership. Employment levels, an important barometer of transit ridership, were flat in downtown Seattle in 2010 and down slightly in King County compared with 2009. Sound Transit's partner agencies experienced bus ridership declines during 2010: King County Metro was down 2.5 percent, Pierce Transit was down 1 percent, and Community Transit was down by 11 percent. Illustrating the inter-dependency between connecting transit systems, the large CT decline directly affected ridership on connecting ST Express routes during the quarter, particularly on weekends.

Specific mode and individual route trends are discussed on page 2.

¹⁻Revenue hours: The total amount of time during which service is available to carry passengers. Tacoma Link reports as service hours since it does not collect fares.

²⁻Cost per boarding is calculated as the total actual operating costs (including Agency overhead) before depreciation divided by the total number of riders.

³⁻On-time performance standards are described in the budget. A Central link light rail train is late if it a) departs a terminal station more than one minute late or, b) arrives at a terminal station three or more minutes late and is unable to make its departure time.

⁴⁻Preventable accident: An accident in which the operating employee(s) failed to do everything reasonable to prevent the accident.

Fourth Quarter Ridership Highlights

ST Express bus boardings decreased by 5 percent overall and average weekday boardings decreased by 6 percent. Route-level ridership results were mixed, with relatively stable ridership on routes serving Snohomish County and East King County but decreases on most routes serving South King County and Pierce County. Boardings on Route 560 (West Seattle-Bellevue) decreased by 31 percent, largely because of a major service reduction implemented earlier in the year and fewer transfer connections at Sea-Tac Airport, Fourth Quarter boardings on Routes 577/578 (Seattle-Federal Way-Puyallup) increased by 123 percent because of a full weekday and Saturday schedule introduced in February 2010. On the other hand, boardings on Routes 590-595 decreased by 18 percent despite stable service levels throughout the year. One reason for the lower ST Express ridership is that the 2010 totals do not include the Link Connector bus, which was replaced by the light rail extension to Sea-Tac Airport in December 2009. Apart from the Oct. 4 start-up of new Route 542 between Redmond and the University District, there were no significant changes in service during the guarter, and no changes in fares.

Sounder commuter rail boardings decreased by 8 percent overall. North Line commuter boardings were down by 20 percent, while commuter boardings on the South Line were down by 7 percent. Special event train boardings decreased by 10 percent on the North Line but were up 3 percent on the South Line. Service on the North Line was disrupted by mudslides on December 13-14. As mentioned on page 1, December boarding totals were also adversely impacted by Christmas and New Year's Day falling on a Saturday; this reduced ridership on the Friday before as many people took the day off work. The impact was particularly severe on Sounder with its very high proportion of commuter ridership. Apart from minor schedule adjustments on the South Line, no Sounder service changes or fare increases were implemented during the quarter.

Central Link ridership was up 38 percent over Fourth Quarter 2009. However, the Airport Link extension did not begin operation until Dec. 19, 2009, so the 2010 totals include the substantial new ridership generated by the Sea-Tac station. Looking at quarterly trends during 2010, average weekday boardings were 16,979 during the First Quarter, 21,766 during the Second Quarter, 23,762 during the Third Quarter, but then dropped to 21,611 during the Fourth Quarter. No changes in service levels or fares were implemented during the guarter.

Central Link Paratransit ridership was up 35 percent, similar to the increase in fixed-route ridership on the parallel light rail line.

Tacoma Link showed a 3 percent increase in boardings for the quarter, despite the loss of a major downtown Tacoma employer in October 2010. Average weekday ridership remained stable at just over 3,000 boardings. Service levels remained unchanged and no major interruptions of service occurred during the guarter.

⁻kevenue nours: The total amount of time during which service is available to carry passengers. Tacoma Link reports as service hours since it does not collect fares.

¹⁻Does not include downtown Seattle ride free boardings

²⁻Cost per boarding is calculated as the total actual operating costs (including Agency overhead) before depreciation divided by the total number of riders.

³⁻On-time performance standards are described in the budget. A Central link light rail train is late if it a) departs a terminal station more than one minute late or, b) arrives at a terminal station three or more minutes late and is unable to make its departure time.

⁴⁻Preventable accident: An accident in which the operating employee(s) failed to do everything reasonable to prevent the accident.
